SKILLS

Languages
- HTML
- CSS
- JavaScript
- Java
- SQL

Frameworks
- React
- Spring Boot

CERTIFICATIONS

- W3Schools JavaScript
- CIW Internet Business Associate

CAREER OBJECTIVE

As a dedicated Full Stack Engineer, I am passionate about creating seamless user experiences through the power of React. With a strong foundation in HTML, CSS, JavaScript, and Java, I excel in developing dynamic web applications. My expertise extends to integrating API and database development using MySQL and Spring Boot. I am committed to crafting intuitive and visually appealing interfaces that enhance user satisfaction. I am seeking opportunities to leverage my skills and contribute to innovative projects in a collaborative and dynamic development environment.

PROJECTS

E-Commerce Store
- Developed a modern and highly responsive e-commerce website from the ground up using React, Tailwind, TypeScript, and Next.js, resulting in a seamless and engaging user experience.
- Designed and implemented a scalable and efficient database structure with Prisma, enabling rapid data retrieval and ensuring optimal website performance.
- Leveraged PlanetScale to manage the MySQL database, allowing for effortless scaling and enabling the website to handle traffic without downtime or performance degradation.
- Integrated Stripe payment processing, ensuring secure and reliable transactions and significantly reducing cart abandonment rates by streamlining the checkout process.

Mixifi
- Crafted an engaging front-end landing page using HTML, CSS, and JavaScript to showcase a diverse range of services, along with an appointment booking section.
- Implemented a dynamic filtering mechanism using JavaScript, enabling users to seamlessly explore and narrow down services based on their preferences.
- Ensured a responsive design that adapts seamlessly to various screen sizes, offering a consistent and visually pleasing experience across devices.

ConnectKeeper
- Designed and developed a comprehensive Employee Contact Application from the ground up, offering a user-friendly interface for adding, removing, and editing employee information.
- Leveraged Java and Spring Boot to build a robust and scalable backend, implementing RESTful APIs for seamless communication between the frontend and backend components.
- Utilized React to create a dynamic and responsive user interface, resulting in a modern and intuitive experience for users while ensuring cross-browser compatibility.
- Integrated MySQL as the database management system, optimizing data storage and retrieval and ensuring data consistency and reliability.
