Summary

Dedicated Front-End Web Developer with a passion for crafting seamless user experiences through React. Proficient in building dynamic web applications, I bring a strong foundation in HTML, CSS, JavaScript, and Java alongside expertise in React to create intuitive and visually appealing interfaces.

Projects

Spotify Clone   *09/2023 - Current*

- Utilized React to create an interactive and responsive user interface, ensuring a user-friendly and engaging experience for music enthusiasts.
- Integrated the Spotify Developer API to enable real-time music playback, search functionality, and user authentication, providing access to an extensive library of songs and playlists.
- Developed a dynamic and user-centric playlist management system, allowing users to create, edit, and organize playlists, resulting in a personalized music experience.

E-Commerce Store   *08/2023 - 09/2023*
Thrift Threads

- Developed a modern and highly responsive e-commerce website from the ground up using React, Tailwind, TypeScript, and Next.js, resulting in a seamless and engaging user experience.
- Designed and implemented a scalable and efficient database structure with Prisma, allowing for rapid data retrieval and ensuring optimal website performance.
- Leveraged PlanetScale to manage MySQL database to scale effortlessly, enabling the website to handle traffic without downtime or performance degradation.
- Integrated Stripe payment processing, ensuring secure and reliable transactions, and significantly reducing cart abandonment rates by streamlining the checkout process.

Employee Contact List   *07/2023 - 08/2023*
ConnectKeeper

- Designed and developed a comprehensive Employee Contact Application from the ground up, offering a user-friendly interface for adding, removing, and editing employee information.
- Leveraged Java and Spring Boot to build a robust and scalable backend, implementing RESTful APIs for seamless communication between the frontend and backend components.
- Utilized React to create a dynamic and responsive user interface, resulting in a modern and intuitive experience for users while ensuring cross-browser compatibility.
- Integrated MySQL as the database management system, optimizing data storage and retrieval, and ensuring data consistency and reliability.

Education

ChooseU Junior Full Stack Java Developer Program | 03/2023 - 07/2023
Training Participant

- Participated in a 16-week, 460+ hour Junior Full Stack Java Developer program that emphasized hands-on practical application.
- Learned and deployed the technologies involved in creating full-stack web applications with Java using Spring Boot Framework, JavaScript, HTML5, CSS3
- Implemented basic unit tests and deployed the application to Heroku.

Technical Skills/ Certifications

Languages: JavaScript | HTML | CSS | SQL | Java
Frameworks: React | Spring Boot | Spring Data JPA | Spring Security (JWT) | Unit Testing (JUnit, Mockito)
Certifications: W3Schools JavaScript, May 2023, CIW Internet Business, April 2016
